# Technical Bulletin G2-2

## Installing New Coffee Brewer Top

1. Remove brackets from bag provided. Locate 2 screw holes on the bottom left of the cooler.

2. Attach bracket to cooler using screw holes. Repeat steps 1 and 2 for the right side.

Power Switches  
↓

3. Remove original lid and disconnect the two power switches (making sure to mark wires).

4. Remove switches from original top and install in new top.

5. Remove top corner screws. Install mounting blocks (left and right) making sure the cooler body is inserted into block groove w/mounting screw on outside. Line up new top flush with face of cooler.

6. Connect switch wires. Reinstall rear screws making sure to line up mounting holes.

*The more support the better!*

7. Place cooler against a wall for additional support and adhere 2 velcro pieces provided to each side of back of brewer top.
